Production in quantities of one whom to finished wrouse, as is done in the Pord motor plant.

"The opposing current of opinion is that the peculiar strength of French industries lies in the ability to turn out a great diversity of articles, each finished with artistic perfection in a way which other countries are not generably able to imitate, as it is the required of the artistic endowment of the people. Broadly speaking, French industry has arisen to satisfy its own home wants, which are not large but very diversified.

The report of the commission notes with emphasis that its curiosity was aroused in St. Etienne, Lyons and other French towns by manufacturing plants which appeared to be almost typically American. In every instance it was discovered that the companies operating these plants also owned plants in the United States.

American Coöperation

PARK ESTATE \$876,832 Tax Appraiser's Report Shows Widow

\$15.000 BELMONT GEMS SOUGHT IN PAWNSHOPS Were Taken from August, Jr.'s, Long

William C. Clark, of Mount Vernon, Island Home A request on the Detective Bureau to search New York pawnshops for \$15,000 praised the estate of George C. Park, worth of jewels belonging to Mrs. Auwho died at his country house at Harrison on the Sound, at \$876,832.47.
The report will be filed to-morrow.
The estate will pay an inheritance tax of \$18,355.45. gust Belmont, jr., yesterday revealed that an extraordinary burglary had been committed in the Belmont home of \$18,365.45.

The report says that a balance of the residue, amounting to \$309,500.13, is given to the widow. Fanny A. Park.

Mr. Park left personal property valued at \$571,832.47, and real estate worth \$305,000. at Bayshore, Long Island, by a burglar

of remarkable skill in lock picking.

The theft occurred on September 24, 1916. That night a late caller, unan-

Dr. Alsberg to Tell

Women of Vitamines

Due appreciation of calories and the part they play in purees and pies is not all that is required of the modern cook. She should not overlook the vitamine, and that is precisely what the cooks of New York are doing, according to Dr. Carl Alsberg, who succeeded Dr. Harvey Wiley as head of the United States Bureau of Chemistry.

By Alsberg to Tell

Women of Vitamines

1916. That night a late caller, unannounced and unanticipated, slipped noiselessly upon the gallery of the Belmont home, near Bayshore. He had no key, but the locked front door stayed his progress only a moment.

Through the dim hallway, possibly past a nodding second butler, and on up the broad staircase his soundless steps carried him. Straight to the door of Mrs. Belmont's boudoir he wont. A steel wire in a keyhole need make no sound if manipulated with sufficient skill. The stranger passed on into the chamber. Some time later he departed, thoughtfully relocking doors behind him.

Returning the next day, Mrs. Belmont missed, one of her four jewel

many persons, particularly the very poor, to do likewise.

The first recruit is Mrs. Marshall Lansing Emery, of 273 West Ninetieth Street, who says that she is particularly anxious to have Eugene, her French chef, try out the menu.

Meals for Charlty

If Mrs. Emery's family survives the condail of Diet Squad meals is good condition she will attempt to introduce them into charitable work in which she is interested.

"I am much interested in the work of the squad," she said yesterday. "I be lieve that it might be helpful to those who have to watch where the pennies it is all right."
